# Notice under Section 708A(12C)(e) of the *Corporations Act 2001* (Cth)

On 2 July 2024, Liontown Resources Limited (ASX: LTR) (Liontown or the Company) announced that it had entered into a subscription agreement (*Subscription Agreement*) with LG Energy Solution, Ltd (*Investor*) pursuant to which the Investor has agreed to subscribe for US\$250,000,000 of unlisted convertible notes, convertible into fully paid ordinary shares in the Company (*Convertible Notes*).

Following the issue of the Convertible Notes today, Liontown has prepared this cleansing notice (*Notice*) for the purposes of section 708A(12C)(e) of the *Corporations Act 2001* (Cth) (*Corporations Act*), as notionally inserted by *ASIC Corporations (Sale Offers: Securities Issued on Conversion Notes) Instrument 2016/82* (*Instrument 2016/82*), to permit freely tradable fully paid ordinary shares in the Company (*Shares*) to be issued on conversion of the Convertible Notes issued by the Company to the holder of the Convertible Notes.

A summary of the terms and conditions attaching to the Convertible Notes are outlined in Annexure B.

### Effect of issue of the Convertible Notes on the Company

The Convertible Notes have been issued to the Investor today without disclosure under Part 6D.2 of the Corporations Act.

The principal effects of the issue of the Convertible Notes on the Company are as follows:

- increase the Company's cash reserves by approximately US\$250,000,000;
- increase the number of convertible notes on issue from nil to 250,000,000; and
- increase the Company's indebtedness by an amount equal to US\$250,000,000.

As disclosed in the Company's announcements to the ASX on 2 July 2024, the proceeds from the issue of the Convertible Notes are intended to be used in connection with the Company's Kathleen Valley Project.

The Investor may convert the Convertible Notes to Shares, either in whole or in part, at the conversion price of A\$1.80 per Share (subject to adjustment in accordance with the terms and conditions of the Convertible Notes) (*Conversion Price*). The number of Shares to be issued on conversion of the Convertible Notes (assuming all Convertible Notes are converted at the same time) is the aggregate of US\$250 million initial face value and any capitalised interest, divided by the Conversion Price at the time.

If the Convertible Notes are converted in whole or in part, this will dilute existing shareholders of the Company.

### Potential effect of the Convertible Notes on the Company's capital structure

Assuming conversion of all of the Convertible Notes today at a Conversion Price of A\$1.80 per Share, the capital structure of the Company is as follows:

Capital Structure	Share Capital
Shares on issue	2,425,004,880
Unlisted Performance Rights	10,222,758
Unlisted Options	500,000
Fully diluted Shares on issue before conversion of Convertible Notes	2,435,727,638
Maximum number of shares to be issued on conversion of Convertible Notes	210,437,711
Fully diluted Shares on issue following conversion of the Convertible Notes	2,646,165,349

#### Notes:

- 1. Under the terms of issue, the Convertible Notes are convertible into Shares at any time after the date that is 6 months after the Issue Date (or if there is a change of control proposal during that 6 month period), up until the date that is 5 Business Days prior to the Maturity Date.
- In summary, assuming all Convertible Notes are converted, the number of Shares to be issued on conversion equals the A\$ equivalent at the time of the principal amount of the Convertible Notes (the face value of US\$250 million plus any capitalised interest) divided by the Conversion Price at the time.
- 3. The calculation above assumes conversion at today's date, and therefore does not assume any capitalised interest. The calculation also uses a A\$:US\$ exchange rate of 0.66.
- 4. Subject to certain restrictions, the Convertible Note terms also allow the Issuer to make interest payments in the future by the issuance of shares at the prevailing market price at the relevant interest payment date. Whether the Issuer elects to pay interest by the issuance of shares in the future is not known, and accordingly the calculation above does not include any such share issuance, which would have a further dilutionary effect.

### Potential effect on control of the Company

The level of ownership of Shares by the Investor if the Convertible Notes are converted, will depend on a number of factors, including the number of Convertible Notes that are converted to Shares, the A\$:US\$ exchange rate at the time of conversion, the number of Shares held by the Investor and the number of Shares on issue at the time of conversion.

However, based on:

- the current Conversion Price of A\$1.80;
- the principal amount of US\$250 million (the initial face value, without including any amount for capitalised interest) being converted;
- conversion being effected using a A\$:US\$ exchange rate of 0.66; and
- the current number of Shares on issue,

the maximum number of Shares that the Investor would be entitled to upon conversion of the Convertible Notes is approximately 8.0% of all Shares currently on issue.

### Pro-forma statement of financial position

Set out at Annexure A is a pro-forma statement of the Company's financial position as at 31 December 2023, based on the Company's financial statements included in the Company's half year report for the half year ended 31 December 2023, lodged with ASX on 15 March 2024, adjusted to reflect the issue of the Convertible Notes.

The pro-forma statement of financial position:

- has been prepared in accordance with the Company's usual accounting policies under Australian Accounting Standards and Interpretations issued by the Australian Accounting Standards Boards (*AASB*) and the Corporations Act;
- is presented in abbreviated form in so far as it does not include all the disclosures required by the Australian Accounting Standards and Interpretations issued by the AASB applicable to annual financial statements;
- is not audited and is based on financial statements that have been reviewed by the Company's auditor;
- has been prepared using the initial face value of the Convertible Notes of US\$250 million, and applying the A\$:US\$ exchange rate as at 31 December 2023 of 0.68; and
- has been prepared on the basis that the Convertible Notes include embedded derivatives (the conversion component for which the Convertible Note terms adjust the security into a variable number of Shares in the Company). The debt host component of the Convertible Notes is initially recognised as a financial liability at fair value (being fair value of the proceeds received less the fair value of the embedded derivative) and subsequently, the debt is measured at amortised cost. Any movements in the fair value of the embedded derivative and effective interest associated with the debt host component will be recognised in the Company's statement of profit or loss. The pro-forma statement of financial position has been provisionally prepared for the Convertible Notes and, accordingly, the allocations between current liabilities detailed therein are subject to future change.

### **Rights and liabilities attaching to the Convertible Notes**

A summary of the terms and conditions attaching to the Convertible Notes are outlined in Annexure B. The summary is not exhaustive and does not constitute a definitive statement of the rights and liabilities of the Company or a Noteholder under the Convertible Notes.

### Rights and liabilities attaching to Shares that may be issued on conversion of the Convertible Notes

Each Share issued to the Noteholder upon conversion of a Convertible Note will be a fully paid ordinary share in the capital of the Company and will rank equally with existing Shares on issue in the Company in all respects with effect from the date of issue of such Shares.

Voting Rights	Subject to any rights or restrictions for the time being attached to any class or classes of shares, at a general meeting of the Company, every holder of fully paid Shares present in person or by an attorney, representative or proxy has one vote on a show of hands and one vote per Share on a poll.
General Meetings	Each member is entitled to receive notice of, and to attend and vote at, general meetings of the Company and to receive all notices, accounts and other documents required to be sent to members under the Company's constitution, the Corporations Act or the Listing Rules.
Dividend Rights	Subject to the Corporations Act and the Listing Rules, the Company's directors may from time to time determine that a dividend is payable to the holders of Shares in proportion to the number of Shares held by them respectively and are paid proportionately to the amounts paid or credited as paid on Shares.
Rights on winding up	In a winding up, the Shares attract the right to participate equally in the distribution of the assets of the Company (both capital and surplus).
Offer of Shares	Subject to the Company's constitution, the Corporations Act and the Listing Rules, the Company's directors may, on behalf of the Company, issue or grant options over Shares to any person on the terms, with the rights, and at the times, that the Company's directors decide.
Transfer of shares	Generally, Shares are freely transferable, subject to formal requirements, the registration of the transfer not resulting in a contravention of or failure to observe the provisions of Australian law and the transfer not being in breach of the Corporations Act or the ASX Listing Rules.
Variations of rights	Unless otherwise provided by the Constitution, if at any time the share capital of the Company is divided into different classes of shares, the rights attached to the shares in any class may be varied or cancelled only with the written consent of the holders of at least three-quarters of the issued shares of the affected class, or by special resolution passed at a separate meeting of the holders of the issued shares of the affected class.

#### <u>Notes</u>

1) For the purposes of the pro-forma adjustments, the derivative financial liability has been fair valued using an option pricing model by an independent third party. Post initial recognition, the derivative financial liability will be fair valued through profit or loss and the fair value of the derivative financial liability will be reassessed by an independent third party at each reporting period.

2) The value calculated for the derivative financial liability has been subtracted from the face value of the convertible notes to arrive at the value recognised for current interest bearing loans and borrowings. The interest bearing loans and borrowings will be recognised at amortised cost.

3) The derivative financial liability and the associated loan have been classified as current liabilities because the Noteholder can convert the Convertible Notes into Shares any time after 6 months (or earlier in limited circumstances) from the issue date up until the date that is 5 Business Days prior to the Maturity Date. As a result Liontown does not have the unconditional right to defer settlement of the liabilities for at least 12 months after the reporting period.
